

# Discussion Points For a Multi-Stakeholder Dialogue

- A Regional Multi-Stakeholder forum is important. The forum should include the Private Sector, CSOs and Governments.
- The Multi-Stakeholder forum can act as a important platform for stakeholders to learn from each other.
- The present TLA workshop can be the platform for the Multi-Stakeholder forum

# Discussion Points For Multi-Stakeholder Dialogue

- We suggest to change the TLA workshop to a TLA Multi-Stakeholder Dialogue
  - The dialogue will allow for more interaction on issues between non-state actors and state actors.
  - The focus will initially be on FLEGT VPAs but in the future can be expanded to include REDD+
  - Create a mandate with expected outputs and ground rules for the Multi-Stakeholder Dialogue
  - Identify key themes each year for the Multi-Stakeholder dialogue
  - CSOs as far as possible should also represent the interests of SmEs
- Invite consumer countries to increase dialogue

# Challenges

- Ongoing funding
- ASEAN coordination
  - There is the need to coordinate with ASEAN every year for the approval of a TLA workshop / Multi-Stakeholder dialogue
